

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

ProNET LIVE! cell lysis buffer
"Catch 'em all, catch 'em LIVE!"

ProNET LIVE! a cell lysis buffer which has been shown to:

- Have the highest protein recoveries like a strong reducing detergent (SDS or urea) even for membrane proteins.
- Retain an unmatched level of native protein activity!
- ProNET LIVE! reduces non-specific binding while enhancing canonical binding for immunoprecipitation (IP) LC-MS/MS experiments.
- ProNET LIVE! can be used in a variety of common protein purification and characterization protocols, replacing other common reagents directly. Try it.

- General cell lysis
- Membrane protein analysis
- IP with high specificity
- Enhances protein network studies

ProNET LIVE! shows vast improvement over the leading lysis buffer for IP-MS studies.

ProNET LIVE! captures more canonical G12 binders known to be important for tyrosine kinase signaling and cell proliferation in KRC78L transformed HCT116 cells.

ProNET LIVE! allows for the near complete capture of the KRC78L complex from p45 IP in K562 chronic myeloid leukemia cells.
