A stray Moscow pup traveled into orbit in 1957 with one meal and only a seven-day oxygen supply. She died "soon after launch," Russian medical doctor and space dog trainer Oleg Gazenko revealed in 1993. "The temperature inside the spacecraft after the fourth orbit registered over 90 degrees," Lewis says.

The Sad, Sad Story of Laika, the Space Dog, and Her One ...

A July 2, 1959, Soviet launch carried two dogs and the first rabbit into space. The Soviet Sputnik 5 (Aug. 19, 1960) was the first to return animals alive from orbit. The passengers were the dogs Belka and Strelka, plus a gray rabbit, 42 mice, two rats and fruit flies.

Cosmic Menagerie: A History of Animals in Space (Infographic)

The dogs reached space on July 22, 1951, but did not orbit. They were the first mammals successfully recovered from spaceflight. After Laika, the Soviet Union sent two more dogs, Belka and Strelka, into space on Aug. 19, 1960. The animals were the first to actually orbit and return alive.

Laika the Dog & the First Animals in Space | Space

Between 1951 and 1952, the Soviet R-1 series rockets carried nine dogs altogether, with three dogs flying twice. Each flight carried a pair of dogs in hermetically sealed containers that were recovered by parachute. Of these early space-bound hounds, a few have been remembered by name. On August 15, 1951, Dezik and Tsygan ("Gypsy") were launched.

Animals in Space - History Home

This book explores how the themes of aviation and space flight have been depicted in film, animation, art, architecture, and digital media. Incorporating many illustrations, the book covers a wide range of subjects, including the representations of heroes, the construction of myths, and the relationship between visual art forms and Soviet ...

Laika (Russian: Лайка; c. 1954 - 3 November 1957) was a Soviet space dog who became one of the first animals in space, and the first animal to orbit the Earth. Laika, a stray mongrel from the streets of Moscow, was selected to be the occupant of the Soviet spacecraft Sputnik 2 that was launched into outer space on 3 November 1957.
