User Guide Wiki

A user guide, also commonly known as a technical communication document, is intended to give assistance to people using a particular system. It is usually written by a technical writer, although user guides are written by programmers, product or project managers, or other technical staff, particularly in smaller companies.. User guides are most commonly associated with electronic goods ...

VisualEditor gives you the ability to edit without needing to learn wikitext markup, as is required by the default wikitext editor. Unlike that editor, VisualEditor will display the text being edited almost as if it were already published. This guide gives illustrated, step-by-step instructions on the editor's features, although it may occasionally lag behind the release of new ones.
